

# SUSTAINABLE DEVELOPMENT CONSULTING PROJECT SAMPLE ITINERARY SWEDEN - HYBRID

In this hybrid format of a Sustainable Development Consulting Project, students conduct pre-trip work online and at home to be fully prepared for their time on the ground, this time in Sweden. This approach allows the group to get the best of both formats and arrive in the host country fully prepared to present and engage with the challenge, as well as explore the culture of the destination. Take a look at the structure and timeline of how a Hybrid program would look like.

kick-off	<b>Project introduction</b>	
	The initial meeting between students and company reps launches a collaborative journey alongside introductions to build rapport and a shared purpose. The challenge is presented, deepening understanding for the students via an idea exchange session. Communication methods are set for ongoing interaction. Understanding company goals offers insights. This meeting guides engagement, igniting innovative solutions.	
weeks 1 & 2	<b>Research phase</b>	
	During the initial two-week research phase, students explore the presented challenge. They meticulously dissect it through research, interviews and data gathering. This forms a strong knowledge foundation, inspiring creative strategies for insightful recommendations to address the company's challenge effectively.	
end of week 2	<b>End of research phase meeting with host company reps</b>	
	After two weeks of diligent research, students engage in a constructive update meeting with host company representatives. They present their findings, outlining the depth of their exploration and initial insights. This meeting serves as a knowledge exchange, allowing the company to validate and provide input on the research direction. It marks the collaborative inception of the engagement, setting the stage for subsequent phases.	

weeks 3 & 4	<b>Analysis phase</b>	
	<p>After the intensive research, the next two weeks focus on crucial analysis. With rich data in hand, students interpret patterns and insights using analytical tools. Collaborative discussions distill actionable findings, unveiling hidden relationships and fostering comprehensive understanding. This insight forms the foundation for well-informed solutions, marking the transition from raw data to strategic wisdom. It guides students in creating innovative recommendations to tackle the company's challenge effectively.</p>	
end of week 4	<b>End of analysis phase meeting with host company reps</b>	
	<p>Post-analysis phase, students and company representatives convene for a crucial update meeting. Here, students share the key patterns and insights derived from the data. This interaction enriches the analysis, validating its relevance and allowing the company to provide nuanced perspectives. The meeting serves as a synergy of intellect, where ideas are honed further before transitioning into the solutions phase.</p>	
weeks 5 & 6	<b>Solutions phase</b>	
	<p>Building on research, the next two weeks emphasize solutions. Armed with insights, students shape data into actionable strategies, addressing the challenge directly. They synthesize findings, collaboratively crafting innovative, complex-aware recommendations. Critical thinking turns these into tangible action plans, representing their peak efforts and providing practical approaches for the company to tackle the real-world challenge.</p>	
end of week 6	<b>End of solutions phase meeting with host company reps</b>	
	<p>Following innovative solution development, an update meeting ensues. Students present their proposed strategies, elaborating on the creative recommendations formulated. The meeting fosters a collaborative dialogue, refining the solutions through the host company's feedback. It represents the convergence of expertise, enhancing the viability of the proposed approaches as the engagement progresses towards the review phase.</p>	
week 7	<b>Review phase</b>	
	<p>After solutions, the next week focuses on review. Students finalize and validate their proposals, aligning with research insights. Self-evaluation and discussions refine ideas, incorporating diverse viewpoints for comprehensive perspectives. Adjustments enhance feasibility and impact, showcasing dedication to top-quality solutions. This phase refines skills and embodies innovation and excellence in a compressed timeframe.</p>	

end of week 7	<b>End of review phase meeting with host company reps</b>	
	<p>Concluding the review phase, students engage in a pivotal meeting with host company representatives. This session, the final interaction before their international pitch, serves as a platform to discuss and fine-tune their refined solutions. As the culmination of a week's dedicated efforts, this meeting solidifies the connection between their innovative ideas and the forthcoming in-person presentations, ensuring alignment and resonance with the company's expectations.</p>	

week 8	<b>Presentation preparation phase</b>	
	<p>This week, intense preparation unfolds. Rigorous mock-pitches and rehearsals polish delivery and streamline presentations. It aligns solutions with company expectations and enhances communication. This phase transforms ideas into poised presentations, showcasing professionalism and excellence. It bridges theory and real-world application for the upcoming overseas pitch.</p>	

week 9, day 1	<b>Let's go! Welcome to Sweden</b>	
	<p><b>arrive in Stockholm</b> meet ISP Program Manager at the airport</p>	air
early afternoon	transfer to hotel, check-in	bus transfer
	meet in hotel conference room	hotel conference room
late afternoon	<p><b>orientation talk: led by ISP Program Manager and university faculty</b> Get familiar with the upcoming schedule and activities, uncover the secret ingredients for a successful trip, and learn some useful tips from where to find the best exchange rates to what's happening in the city.</p>	hotel conference room
	meet in hotel lobby, depart for welcome dinner	bus transfer
evening	<p><b>welcome dinner</b> Embrace the essence of Stockholm at our welcome dinner, a celebration of both culture and community. Join us as we delve into a tantalizing array of local delicacies, immersing in the heart of Swedish gastronomy. From savory herring to iconic meatballs, let your taste buds dance amidst the flavors of this vibrant city. As we savor each bite, we'll also savor the opportunity to connect, fostering friendships that will flourish throughout our time together. This evening of flavors and conversations promises to be the perfect kickoff to our exciting journey in Stockholm.</p>	restaurant
	rest of the day at leisure	

week 9, day 2		Getting to know Det avlånga landet (the elongated country)
	breakfast	hotel
	meet in hotel lobby, depart for visits	bus transfer
morning	<p><b>briefing session: Swedish economy and business climate</b> <i>e.g. Business Sweden</i></p> <p>Embark on a knowledge-rich journey during this meeting with an esteemed government trade and investment agency.
